

# How to: Linking Trackers

Monitor your daily habits, earn a green day, and lower your RealAge®

## How do the trackers get my information?

Sharecare utilizes several different types of trackers to measure progress towards earning green days: stress, relationship, blood pressure, weight, steps, smoke, sleep, glucose, fitness, diet, cholesterol, alcohol and medications. Tracking operates through a variety of input types based on member selection and the type of information being tracked.

- **Automatic tracking:** The following trackers are currently available for the syncing feature: glucose, sleep, steps, and blood pressure. These trackers can be automatically updated through the device sensors (either directly via the device or by allowing the Sharecare app to synchronize with the iPhone's Health app or Android's Google Fit app). This allows Sharecare to sync with health data already on the mobile device to seamlessly provide daily updates to certain trackers.
- **Manual tracking:** Allows for the ability to manually enter activity data. For example, the diet tracker is optimized by manually tracking the size and quality of meals and snacks. All trackers can be manually updated through the Sharecare app.
- **Customized:** Certain tracker categories are snapshots at any given point in time, and do not typically change on a daily basis, and therefore do not require daily input (e.g. cholesterol). These types of trackers are set to the appropriate cadence for data entry based on personal health status.

## Instructions based on screenshots:

### Syncing trackers with Apple Health:

1. A) Launch the Sharecare app and sign in. Upon login, users will be prompted to receive notifications and reminders from Sharecare; click "Allow." To make sure Sharecare can synchronize data from the Health app, please click "Allow Health Access." (see STAH Visual 1a-1 & 1a-2)

- B) If not prompted to answer this question or if you wish to connect or disconnect automatic tracking, click the heart icon in the bottom toolbar of the Sharecare app to access Trackers. From here, click the gear icon in the top righthand corner, then set automatic tracking preferences. (see STAH Visual 1b-1 & 1b-2)

## Syncing trackers with Apple Health:

- Open the Apple Health App. (see *STAH Visual 2*)
- Click “Sources” from the bottom tool bar, then click Sharecare listed under “APPS.” (see *STAH Visual 3*)

STAH Visual 2

STAH Visual 3

- Select which health categories you would allow Sharecare to read data on or select “Turn All Categories On.” (see *STAH Visual 4a & 4b*)

## Syncing Trackers with Fitbit for iPhone Users:

1. To get started, click the heart icon in the navigation bar to access Sharecare Trackers. Then, click the gear icon in the top righthand corner. (see *STAH Visual 1*)
2. Under “sources” you should see Fitbit listed. Click the “+” next to Fitbit. This will direct you to Fitbit.com where you will enter your Fitbit log in credentials. (see *STAH Visual 2*)
